Stainless steel satin polish

**Stainless steel**

Stainless steel integrates beautifully in any kitchen environment - better than almost any other material. Its main properties:

- Classic, timeless aesthetics
- Rustproof
- Completely heat resistant
- Suitable for food use and hygienic
- Stain and acid resistant
- Non-fading
- Easy to care for

BLANCO uses only highest quality stainless steel of alloy grade 18/10 (DIN 1.4301) this means with roughly 18% chromium and around 10% nickel, to satisfy the highest possible standards.

Conventional stainless steel sinks are cleaned with standard commercial products and polished occasionally with a special product for stainless steel.
